

CWA of California
Action Alert
January 7, 2005

Greetings!

The morally depraved "Kinsey" is opening in many theaters today and "glowing" advertisements by the production company are running on many television channels. Kinsey's reprehensible "research" was almost single-handedly responsible for initiating the sexual revolution in this country. CWA has developed a frank review of Kinsey's flawed "studies" and an excellent response to the lies of the Kinsey culture. The bitter fruit of that culture is plentiful—divorce, pornography, values-free and condom-based sex education, STD's, fatherlessness, abortion, homosexuality and other forms of deviant sex, to name a few. Please note that the articles are frank discussions of Kinsey's work and can be disturbing. To learn about the REAL Alfred Kinsey, visit <http://www.cwfa.org/kinsey.asp>.

Action: Please do your part to expose the truth about Kinsey. Ask your local theater to drop the film from its line-up, or at least limit showings to very late hours with appropriate content warnings. Consider sharing information from our site with the theater manager. A [downloadable flier](#) is available on our national Web site at the link above. The flier is intended to be printed front and back and folded.

Thank you for making a difference!
