

South Dakota Must Continue to Stand Strong Against Embryonic Stem Cell Research and Human Cloning!

The goal of a deceptive ballot measure by the so-called South Dakotans for Life-saving Cures is to overturn our South Dakota state laws and open the door for Embryonic Stem Cell Research (ESCR) and human cloning.

Don't Fall For The Deception!

- ESCR has not treated or cured one disease.
- ESCR has not gone beyond research on lab animals.
- ESCR produces tissue rejection and deadly tumors.
- ESCR kills a days-old human embryo

Our state law; allow for ethical and successful Adult Stem Cell Research (ASCR):

- ASCR has treated or cured over 80 diseases in humans.
- ASCR does not cause tissue rejection or deadly tumors.
- ASCR does not kill a tiny human embryo.

Don't Fall For The Deception!

- The deceptive ballot initiative would overturn our South Dakota state law which bans human cloning.
- 87 percent of the population opposes human cloning.
- Cloning (somatic cell nuclear transfer) is done for both research and reproduction.
- Cloning for research kills a human life, thus, CLONE AND KILL.
- Cloning relegates human life to research material.
- Cloning creates grave health concerns for women who donate eggs.

Our State Law; are Strong. *Don't Fall for the Deception.*
